

Certifikat

We take our raw materials from different suppliers of the company Euroglas with two production sites in Haldensleben and Osterweddingen, Germany. The average distance to these suppliers is less than 150 km.

The EUROGLAS group risk all strains to optimise the process of the glass production constantly and improve to do justice thus to the demands of the ecological lastingness.

We confirm a recycling portion of 25% for the application materials of our production process for float glass after the float procedure which consists as follows:

Portion	consumer	description
Ca. 10 %	Pre-consumer	Return from own process (Edgings, High-class losses u. a.)
Ca. 6 %	postconsumer	Return of own cullets from our customers
Ca. 9 %	postconsumer	Buying recycled – foreign cullets

To produce EUROWHITE we produced 100% of foreign cullets. According to the LEED - Rating - System of the U. S. Green Building Council's arises danit a recycling - rate between 10 - 15%.

Our raw glass is recycleable to 100%.

Euroglas
