

Information for our Customers

Dear Sir or Madam,

EU regulation (EG) 1907/2006, otherwise known as REACH, came into force on June 1st, 2007. It regulates the production, import and market distribution of substances contained in preparations, and substances which are designed to be released from products.

Our products, the float glass brands EUROFLOAT and EUROWHITE, the laminated safety glass EUROLAMEX, the coated glass SILVERSTAR, and the solar glass EUROGLAS PVFlat, are products within the meaning of the REACH regulation. Their functionality is determined principally by their shape, design and surface and not by their chemical composition. According to Annex V (11) of REACH regulation (EG) 1907/2006 there is no requirement to register the aforementioned products or products made of glass.

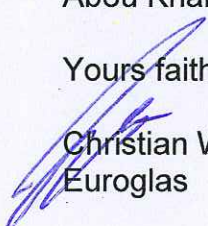

We therefore hereby confirm that we have reviewed in depth the requirements of the REACH regulation. In particular we are well aware of our obligations as a supplier of products, which fall under Article 33 of the REACH regulation. This article states that we are obliged to inform the buyer or consumer if any of our products contain any substances, which the European Chemicals Agency have identified and listed according to Article 59 Paragraphs 1 and 10 of the REACH regulation, and which have a concentration of more than 0.1% weight by weight.

With reference to the aforementioned regulation we can assure you that our products do not contain arsenic, lead, mercury, cadmium, hexavalent chromium (chromium VI), polybrominated biphenyl (PBB) or polybrominated diphenyl ethers (PBDE).

In addition, all raw materials used in glass production comply fully with the requirements of the REACH regulation.

Should you have any questions queries, please do not hesitate to contact Mr. Mouin Abou Khalil on +49 (3904) 638-1207.

Yours faithfully,

Christian Winter
